

H5 Card

Operable under rugged conditions, powered by a replaceable cell battery (battery life up to a year). Thin design, along with easy installation (via stickers, lanyards) and high precision accelerometer sensor, allow for a wide range of use cases (e.g., cargo / machinery tracking, personnel fall detection).

Device specifications:

Main Chip	Nordic nRF52832
Dimension	65.4mm x 43.0mm x 5.7mm
Weight	17.8g (<i>with battery</i>)
Material	ABS+PC & TPU
Waterproof	IP66
Color	White
LED	1 Red
Motion Sensor	Yes
Button	Power ON/OFF, Event Trigger/SOS
RFID	Optional
Operating Temperature	-20°C / +60°C
Humidity	0% ~ 95% (non-condensing)
Power Supply	Replaceable 550mAh lithium coin CR3032 battery
